**Subject:** MBAS Final Report & Other Report Status

Rich,

On the FTP site under EPA Laboratory/Analytical Data\_Feb 2012/R2 Reports there is a directory titled 1201028 FINAL 02 17 2012.pdf. This is the final report from R2 on the MBAS results for all samples. There were some low level hits for MBAS in 13 samples. This report still needs to undergo the Project level review but thought you would want to know about these hits.

More files being uploaded today for methane and R3 reports. I'll try to have a table to submit to you showing the status for all parameters.

We are almost done completing the preliminary report for the expedited compounds (mainly just the newer samples are awaiting results). Do you want me to start creating a preliminary report for all other compounds detected?

Cindy
